

The background features a dark teal color with a grid pattern. On the left, there is a large, semi-circular graphic composed of many small, colorful dots (blue, green, purple) that form a globe-like shape. Overlaid on the right side are several faint, light-colored line graphs and data points, some with numerical values like 23.94, 28.19, and 37.93. The main title is centered in large, bold, white and light green text.
